Strong and durable, our garage doors are made in Australia for the harsh Australian conditions.

Dynamic supports Australian jobs which is why our garage doors are predominately made with the highest quality Australian BlueScope® steel.

trusted for
15
years

Dynamic disrupted the industry with its short lead times, product and service. Dynamic have been trusted by the best in the business for over 15 years.

Award-winning FingerProof™ Safety design is a standard feature for our Steel-Line sectional doors.

Every garage door is custom made and manufactured to your requirements. It's one of the reasons the majority of Australia's major builders choose our Steel-Line garage doors.

Dynamic offers a full range of Steel-Line accessories to suit your personal needs. View our range from page 51.

Dynamic Door Service is a leading garage door company specialising in quality garage doors uniquely designed and manufactured to add real value to every home. We have been installing and servicing garage doors and operators for over 15 years.

We are the largest supplier of Steel-Line Garage Doors in Australia. Our manufacturers have been selected on their capacity to meet and exceed our requirements for superior craftsmanship, reliability and a single-minded focus on excellence in customer service.

Browse our stunning product range and be inspired!

Do more with the Smarter Garage Door.

The smarter and safer way to open, monitor and share access.

Requires Zimi Cloud Connect and Wi-Fi Internet connection. Apple Home requires Zimi Matter Connect. Read the data sheet for system requirements.

Just plug it in.

E-Door Connect simply plugs into a compatible door motor. Setup is quick and simple.

- Compatible door motors.
- Product features.
- System requirements.

Anywhere.
Anytime.

Use your voice,
watch & phone.

Open the garage door

Did you forget to close the door?
No need to worry.

Accept a delivery every time.
Open the door remotely.

Share access with family and friends.
Easier than sharing keys.

Compatible with Photo Electric Beams.
Keep everyone safe.

Link your door with lighting.
Works with smarter switches.

Important: For your safety and the safety of others, we strongly recommend the use of a Photo Electric Beam with your E-Door Connect. A Photo Electric Beam is designed to detect an obstruction while the door closes and sends a signal to the opener to reverse or stop the door movement. If you do not already have Photo Electric Beams installed, please contact your local Steel-Line branch for a quotation to have them installed.

The Custom Collection

Your garage door could be the biggest design feature on your home's exterior, so make sure it's also the most striking. There's a Steel-Line product to suit all designs and architectural styles.

Steel-Line's innovative Custom Collection of garage doors offers over a hundred different options for you to choose from.

Let your imagination run wild with our Face Fixed, Insert Panel and Flush Mount selections. Simply match your garage door to the facade of your home and the style that will best suit your aesthetic.

The maximum width of the "2 sections" door is 4800mm. Outside of these configurations, check with your Product Consultant on price and availability.

Face Fixed Aluminium Frame Selection

The face fixed design is laying the aluminium composite panels over the frame for that architectural look. The aluminium composite panels are the premier choice for an exterior cladding that will maximize the beauty of the structure while providing a sustainable product to prolong the life of the building.

Despite being conveniently lightweight, these aluminium composite panels certainly aren't pushovers. They have impressive durability and strength, making them well suited to bearing the tough conditions of the Australian climate. Our face fixed design is lightweight, weather-resistant, has a maximum wind rating of C3 for wind regions C and D in Australia.

Custom Collection Sectional Flush Mount Door with vertical clad western red cedar.

Flush Mount Selection

Steel-Line's flush mount garage door blends in your facade with the cladding of your choice to create a seamless appearance to the front of your home. Flush finish means the surface of the garage door and the external wall surrounding it are on the same plane.

The flush mount garage doors are suitable to take a total weight of up to 175kg for tilt doors, and 250kg for sectional doors. They can be clad with the building's exterior materials, including timbers, composite timbers, metal, aluminium composite panel and acrylic. The integrated cladding materials make the door appear to be part of the building's wall system. Our flush mount doors are perfect for an architecturally designed building giving the exterior cladding a continuous look and essentially making the door invisible.

NOTE: All flush mount garage doors are made to order. Select a cladding material from our range or order as frame only and get your builder to clad on site to match the rest of your façade for that invisible look.

Flatline Sectional Garage Door in Colorbond® Surfmist®

Colorbond® Sectional Doors

Enhance the exterior of your home with a garage door that will compliment any style of architecture. Our Steel-Line range of garage door styles to suit the unique characteristics of your home.

Sectional garage doors have exceptional weather-resistant qualities. They are resilient against normal wind and dust conditions and come with heavy duty aluminium bottom rails containing PVC weather seals, so you can trust that the precious contents of your garage are protected at all times.

Fingerproof safety standard.

Colorbond® Roller Doors

Our range of Colorbond® colours and smooth operation, Steel-Line garage roller doors become true design features of your home.

Manufactured with heavy duty bottom rails containing durable PVC weather seals, a Steel-Line garage roller door provides your precious garage contents with excellent protection from the harsh elements.

Our Steel-Line roller doors revolve on precision-made drum wheels, and are counter-balanced using helical coil springs to ensure perfect balance and operation. All our springs are heat treated and tempered to give years of trouble free operation.

"AA" series residential door and "B" series light industrial doors are now supplied with Aluminium guides as standard.

Aluminium guide benefits include:

- Lightweight
- Aesthetically appealing
- Smooth and quiet operation
- Effortless installation

The new Aluminium guide can be fitted with an optional brush seal, adding a level of protection against smoke, draughts, salt, light, dust, insects and bushfire embers.

Tilt Doors

Not enough room in your garage for a sectional or roller door? A lot of older garages can be quite limited in space.

Our Steel-Line tilt garage doors offer the perfect solution for smaller garages or spaces with restricted side or head room. Manufactured to fit most garage openings and easily installed, the tilt garage door offers safety and convenience in a wide range of colours and materials.

The choices of material is almost as varied as your imagination allows and commonly includes plywood and moulding, K-panel, Colorbond®, Western Red Cedar, aluminium composite panels, copper sheeting, clear or textured glass/acrylic, and many other types of cladding.

NOTE: Not all options available in all markets. Please refer to your Product Consultant for our wide variety of design options in your area.

Not available in WA.

Best solution when you have limited headroom in your garage.

Louvre Doors

Our Steel-Line aluminium Louvre sectional garage door has been developed to give a high level of airflow and natural light transmission.

Steel-Line sets a new benchmark for Louvre garage doors. Designed and manufactured in Australia, our Louvre garage door is extremely strong with a modern architectural look. It's ability to provide privacy for what is inside and still allow a minimum 22% ventilation, makes this the door of choice for many modern developments.

Steel-Line Louvre garage doors have been engineered to the highest standard and tested at the JCU Cyclone Testing Station against the wind loading requirements of AS/NZS 4505-2012 (also available for C2 & C3).

Louvre garage doors provide security you can trust, allowing ventilation while maintaining high level of privacy.

The Timber Look Series

Your garage door is often the largest and most prominent frontal feature of your home. For this reason, choosing the right garage door is a crucial decision that can significantly influence the value and aesthetics of your most prized asset.

If you like the natural look and warmth that wood conveys, we can offer you Natural Timber, DecoWood®, Colorbond® and UniCote® LUX Timbers of the World.

Each offering has different benefits depending on your requirements, while providing the warm and homely charm that a timber look provides.

Our impressive assortment of beautifully crafted options offers a classic and timeless style that evokes a feeling of tradition with a modern twist.

The above is one of our Natural Timber Garage Doors with V joint profile.

You dream it, we create it.

Timber Selection

The DecoWood® garage door is ideal for coastal properties and bushfire prone areas with its marine grade powder coating. It is made from BlueScope® steel, which is an incredibly versatile material, preferred by builders and designers alike for its strength, durability, flexibility, lightness and corrosion-resistance.

Unlike timber, DecoWood® garage doors don't warp, shrink, splinter or rot. They require little maintenance, and they are also completely impervious to termites.

Colorbond®

Timber Selection

Steel-Line's Colorbond® Timber Selection offers the strength of a Colorbond® steel door with the style of the Colorbond® colours.

A garage door made from Colorbond® steel will also give you lifelong performance. Thanks to the five-layer design of Colorbond® steel, it provides corrosion resistance and a durable baked on paint finish, making it look great and easy to maintain.

With the Colorbond® Timber colours, Colorbond® steel provides an elegant twist providing even greater design opportunities for your home.

Compliments your home and gives your garage door a natural, timber look finish without the price tag.

Natural Timber Selection

Stand out from the crowd with a door as unique as you.

As our timber garage doors are custom designed and manufactured, you can rest assured we will create a product to meet your dimensions and requirements. No matter what shape or size your garage is, a timber door can be made to suit it - and it will look fantastic.

And because this range is custom-built using natural products, you can look forward to having a truly one-of-a-kind garage door that has its own unique look and character.

The most popular timber used in this range is Western Red Cedar, a lightweight yet solid timber that looks equally beautiful on a renovated or new home being built.

Wind rated Slimline Sectional Garage Door in Colorbond® Surfmist

Wind Rated Doors

Stringently tested to meet wind load requirements.

Steel-Line wind rated garage doors have been engineered to the highest standard and tested against the wind loading requirements of AS/NZS 4505:2012.

Strut-Lock™ Wind Rated Sectional Garage Doors

The Strut-Lock door is post free, incorporating the use of heavy duty struts, robust commercial hinges, top brackets in combination with a unique stile reinforcement to provide maximum resistance to forces exerted by cyclonic and high winds up to 5.5m (also available for C2 & up to N4).

Wind Rated Wind Brace Sectional Garage Doors

The Wind Brace design feature with removable steel wind brace post(s) is installed to the sectional garage door once a cyclone warning is received. It takes about 2-5 minutes to install, and no tools are required. This feature can significantly enhance wind resistance up to C4 wind rating while still ensuring a smooth door operation (also available up to 6m for C2, C3, C4 & up to N6).

Wind Rated Roller Doors

The wind rated roller doors are designed to provide additional wind resistance in extreme weather conditions. The new Wind Rated roller doors have been designed to reduce noise and increase service life. Optimised to suit your requirements, the Wind Rated roller doors are suitable for homes, sheds, commercial and industrial warehouses in cyclonic and non-cyclonic areas (C2/N4 up to 5.5m).

*not all doors compatible. Please refer to our wind rated brochures for each door type.

- 1 x battery backup unit, 2 x E960G 4 channel keyring transmitters, 1 x E138G wireless wall transmitter
- 2 year, 10000 cycle warranty

HOME ENHANCERS

Coastal Upgrade Pack

Sectional Door Upgrade Pack includes Brush Seals, Powdercoated tracks and brackets and stainless steel cables.

Roller Door Upgrade Pack includes Brush Seals, AA Aluminium tracks with the no lock option.

The Coastal Upgrade Packs for both Sectional Doors and Roller Doors are recommended for all doors that are located within 5 kilometres from the sea to offer enhanced protection against the elements.

Photo Electric Beams

The Photo Electric Beam is designed to detect an obstruction while the door is closing and to send a signal to the opener to reverse or stop the door movement. It helps to protect your family from injury and your car from the damage caused by contact.

Wireless Keypad

The keypad can be programmed with multiple, unique user codes. It is perfect for the family, trades people, or even just going for a walk. This means you can leave your keys at home and still access your garage.

Additional Handsets

Key ring remote transmitters are small and convenient with the ability to operate up to four doors or gates from the one unit. A must have for every set of keys in the house.

Brush Seal

A tough and durable brush seal can help better protect your garage from the elements and satisfies the "Construction of buildings in bushfire-prone areas" standard AS3959:2018 for protecting against fire embers entering the garage.

Powermesh products work with the Zimi home ecosystem. Make your life easier and get connected today. www.zimi.life

Control your garage door anytime, anywhere with the Powermesh home automation system. For more information see page 6-7.

For the latest news and updates see dynamicds.com.au.

Battery Backup

A battery backup provides an energy supply in the event of a power cut.

Available for SD800, SD1200, RD800 and RD1200 motors, as well as the Marantec Comfort 380.

Emergency Key Release

Used in case of malfunction or power failure, especially useful if there is no other access to the garage.

Wireless Wall Mounted Remote

Can be installed near an internal access door to your garage giving you greater convenience to open and close your garage door.

Garage Door Insulation

Steel-Line garage door insulation minimises the effects of the harsh Australian climate, by reducing heat loss and heat gain transferring through the door panel.

Only available with Colorbond Sectional/Smooth and Powdercoat doors.

Cut energy costs

Automatic locking system for your Garage Door.

Automatic Garage Door Deadbolt SD by Steel-Line

The Automatic Garage Door Deadbolt by Steel-Line provides convenience when it comes to entering and exiting your garage. With just the push of a button, you can open, close and lock your garage door with ease, saving you time and effort.

How it works?

The Automatic Garage Door Deadbolt by Steel-Line has been designed using advanced technology and will automatically engage when you close your door using your remote control.

The locking pin extends when the door reaches the closed position.

When opening, the locking pin will automatically retract, disengaging the deadbolt and allowing the door to raise to position.

Features

Set and forget. No regular charging or battery changing requirement

High quality, slim, attractive aesthetic enhances its sophisticated design

Effortless installation and integration with the Steel-Line SD motor range, with Marantec option available

Simple disengagement in the event of power failure

Engineered with the latest electronic technology

NOTE: Compatible with double or single sectional garage doors.

Defy the odds...

show them what's possible.

Our story.

"We were the ones that showed them it was possible." - Michael

From humble beginnings, Dynamic Door Service has become the leading supplier of garage doors to the Australian builder market. Dynamic's success has come from the ability to seize opportunity and follow through on their commitments each and every time.

In 2009, Brisbane based founder Michael Vidler saw a gap in the garage door market. The industry "norm" to get a garage door ordered and installed was two to three weeks... this is the way it had always been done.

Mick knew that in an industry full of furious deadlines, this lead time put additional and unnecessary pressure on builders and set about disrupting the status quo, initially as a one-man band approaching builders at building sites.

The Dynamic solution was to provide a mechanism to consistently deliver the shortest lead times in the industry, guaranteed installation dates and, after some initial trial and error, to partner with Steel-Line Garage Doors to supply the best product on the market.

Whilst skeptical, a handful of small builders gave Mick an opportunity to prove his solution would work. Mick was a man of his word... he built an expert, energetic and passionate team who at their very core made sure they delivered on their commitments, time after time, year after year. It wasn't long before some of the major builders in Australia took notice, then some more, and the rest is history.

The Dynamic team are driven by opportunity with an energy that creates a new standard of reliability.
